## Sciences, Peshawar

### Introduction:

Floods are one of the most destructive disasters in the world. Recently in 2025 Pakistan has faced a lot of flooding in different cities of Pakistan especially in KPK province. These flooding and cloud burst caused thousand of people in problems like it destroyed homes crops and other things. Because of these problems, peoples were displaced and have lack of food, shelter and other essential items.

We group of three students from FAST-NUCES Peshawar Campus worked volunteerly with **Alkhidmat Foundation** to participate in **Flood Relief Packing Drive**. In this project we have to participate in packing organizing and preparing the kits for families that would be distributed in flood affected area of KPK.

### Project Goals and Objectives:

#### Goals:

1. Primary goal is to participate in the relief efforts by preparing essential supply packages for families affected by floods this year.
2. To promote civic sense and responsibilities among university students and young generations.
3. Alkhidmat foundation also needed volunteers for this drive. Our goals is to support alkhidmat foundation to complete their packing relief drive.

#### Objectives:

1. Our primary objective is to work with alkhidmat foundation and to prepare packing kits fro about 150 flood affected families in kpk.
2. To work volunteerly for multiple days in packing and organizing supplies.

### Alignment with SDGs:

This project directly alligns with the following SDGs:

1. **SDG 1 (No Poverty):** Our project aligns with this SDG by supporting flood affected families with basic accessories
2. **SDG 2 (zero hunger):** Aligns with this SDG by ensuring food availability through relief packages.

## Project Description:

The time duration of our project was 15 hours (4 hours per week). We worked with Alkhidmat Foundation about 4 weeks. In the first 2 weeks (8 hours), our group participated in a packing drive activity held at **CECOS** university, where on the first day, we received all the materials one by one and placed in a Hall located at 2<sup>nd</sup> floor of the building. On the second day at **CECOS university**, we cooperated with foundation by packing organizing the material and made kits which were sent to SWABI from there. In the next 2 weeks (7 hours), we continued our participation with Alkhidmat foundation at their **Khyber Kallay Office**, we almost repeated the same process, first day we received all the materials then packed it and load it to the trucks.

The materials in this drive includes variety of essential and basic need items such as **charpays, baltis, bartan, sugerm tea, milk, blankets, cooking oil, rices, biscuits, hygiene kits, clothes and other basic necessities.**

All three of us participated in the entire process. First we unloaded the material from the trucks, bring them to target place one by one, sorted the material, and then packed the items for each family. Each kit was carefully filled so that it contain same amount and different items like food, clothing and hygiene material. After packing, we labeled the kits according to their destination areas and then reloaded all the materials back to truck which were then be delivered to flood affected regions.

## Timeline of the project:

| Task/Activity                                        | Collaborating Organization | Hours Spent | Start Date | End Date | Group Members |
|------------------------------------------------------|----------------------------|-------------|------------|----------|---------------|
| Unload and sort items at CECOS university            | Alkhidmat foundation       | 2           | 01/9/25    | 1/9      | 3             |
| Packed, labeled and reload items at CECOS university | Alkhidmat foundation       | 2           | 2/9/25     | 2/9      | 3             |
| Unload and sort new                                  | Alkhidmat                  | 2           | 9/9/25     | 9/9      | 3             |

|                                                          |                      |   |         |      |   |
|----------------------------------------------------------|----------------------|---|---------|------|---|
| items at same place                                      | foundation           |   |         |      |   |
| Packed, labeled and reload items at same place           | Alkhidmat foundation | 2 | 10/9/25 | 10/9 | 3 |
| Unload and sort items at Khyber Kallay Office            | Alkhidmat foundation | 2 | 16/9    | 16/9 | 3 |
| Packed, labeled and reload items at Khyber Kallay Office | Alkhidmat foundation | 2 | 17/9    | 17/9 | 3 |
| Unload and sort items at Khyber Kallay Office            | Alkhidmat foundation | 2 | 28/9    | 28/9 | 3 |
| Packed, labeled and reload items at Khyber Kallay Office | Alkhidmat foundation | 1 | 29/9    | 29/9 | 3 |

## Expected Outcomes:

1. Over 150 families were supported through relief kits.
2. Build teamwork, coordination and leadership skills among students.
3. Enhanced understanding of how NGOs manage and deliver large-scale assistance.

## Conclusion:

This flood relief packing drive was a meaningful experience that allowed us to practically serve humanity while learning about teamwork and social responsibility. By engaging directly in relief work, we realized how small efforts can collectively create a significant impact in the lives of those struggling to rebuild after disasters. We are grateful to **Alkhidmat Foundation** and **FAST University** for providing this opportunity to contribute to society.
